Some Rare Items of the Foreign Post Offices in Palestine

Norman J. Collins

Introduction

In this article I propose to illustrate some items which were discovered in 1991/1992, and items reported too late for inclusion in Volume 2 of "The Foreign Post Offices in Palestine 1840 – 1918"¹. The postmarks on these items have been included in the tables, but it was not possible to illustrate the 'proving' covers as this would have meant the resetting of too much of the work. This article, therefore, is meant to remedy that fact. Also included is a rare Italian essay of a postcard, and an Italian cover with an Insured Mail label which only came to light after printing had begun.

References to Vol. 1 or Vol. 2 in this article refer to the above named reference work.

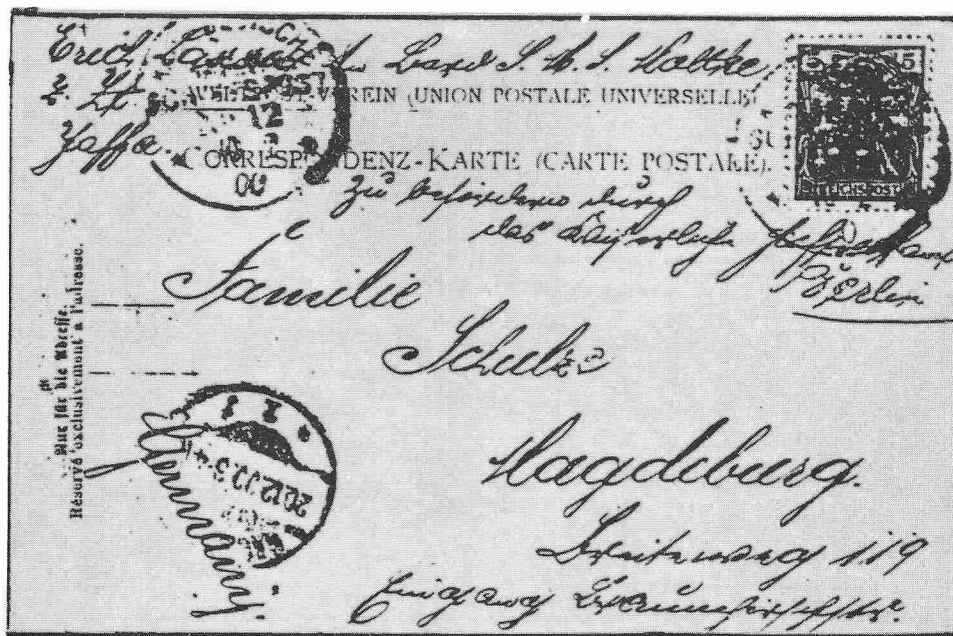

Fig. 1: Postcard from the SMS "Moltke" whilst in Jaffa harbour on the 10th December 1900. The card was cancelled by Naval postmark No. 12, dated the same day.

1. German Naval Mail from the Holy Land

On page 24 of Vol. 1, Anton Steichele records the visit of SMS "Moltke" to Jaffa in December, 1900. The period of the visit was listed as between 2nd and 6th December. Recently I acquired Steichele's Naval mail items and discovered a card from the SMS "Moltke" written on the 10th, receiving the No. 12 Naval postmark of the same date (Fig. 1). From this it would seem the ship was in Jaffa again on that date. As this date was not recorded by Steichele, I can only assume that he acquired the item after he had completed his drafts. Readers should add 10th December 1900 to the dates the vessel was at anchor in Jaffa Harbour.

2. The Italian Post Office in Jerusalem

In Vol. 2, p. 207, I list a mute insurance label (no handstamped or printed name of the Jerusalem P.O.) and illustrate a cover (in Figure 205, p. 211) with this label, type PI, which was posted on the opening day of the P.O. - 1st June, 1908.

In mid-March, 1992, Colin Pilkington (the editor of Fil-Italia) sent me a proof of

Fig. 2: Insured letter to Venice, posted on 17th September 1908, franked by two 10 para/5c and one 40c and cancelled by type 401 postmark. The insurance label is the newly discovered type I - This is the only recorded example so far known.

the English version of an article entitled "The Italian Post Office in Jerusalem" by Mario Chesne Dauphine, which originally appeared in Italian in "Il Bollettino Prefilatelico e Storico Postale", No. 74. In this article an insured cover is shown, with the Jerusalem handstamp applied similar to Registration label type A. Also reported is the use of registration label similar to type A, but mute (no handstamp), but no confirming cover is shown. Here I show the rare insured cover with this new label (Fig. 2) which has been listed as Ins. Label I, the earlier label being listed as type PI (Provisional Insurance label).

In the book on the Foreign P.O.'s we did not list postal stationery, as it was beyond our scope. Figure 3 and the Front Cover illustration show a rare essay of the "Gerusalemme" overprint used on Italian issued postcards, but on a 10 cent card with the 1901-type head.

Figure 4 shows the issued type, with the 1906 "Leoni" head design.

Fig. 3: An essay of the 1910 imprinted stamp design postal card with "Gerusalemme" overprint and surcharge. Only the 1906 "Leoni" design card was issued in Jerusalem.

Fig. 4: The issued "Leoni" type postcard with the "Gerusalemme" overprint and surcharge. Only cards with this imprinted stamp were issued in Jerusalem.

3. Italian Forces in Palestine, World War I

In Vol. 2, pp. 230 to 235, the original research of Luciano Buzzetti is recorded on the subject², including the types of cachets used by the Italian Detachment in Palestine.

In February 1992, Buzzetti reported to Arie Ben David a new discovery. This discovery is a cover with a previously unrecorded cachet reading **COMMANDO - BERSAGLIERI DEL DISTACCAMENTO... (ITALIANO DI PALESTINA?)** (Fig. 5). The section in brackets is assumed to be what should follow, as this does not show. The centre has the coat-of-arms as in types A to M and Q to S.

The cover is cancelled by Indian F.P.O. No. 28 (over the Italian cachet), allocated to the Indian 20th Brigade, which was part of the composite force that took part in the third battle of Gaza on 27th October, 1917³.

*Fig. 5: The newly discovered Italian detachment cachet, on a cover cancelled by Indian F.P.O. No. 28 postmark dated 7th November, 1917.
(Courtesy L. Buzzetti).*

4. The Russian Post Office in Jaffa

Below are shown three items which could not be included in Vol. 2, due to their late discovery. These are the card and a cover with the only examples known to me with postmark type 629A (Figs. 6, 7) and a registration receipt with the unique type 633B postmark.

The postcard has the earliest recorded ROPiT double circle type postmark as a receiver – 17 November, 1898. It was posted on 4th November, transit Odessa 5th and Constantinople 8th November. The cover of Figure 7 has the earliest recorded example as a dispatch mark. Only two examples of this postmark have been recorded: this and the example in Figure 6.

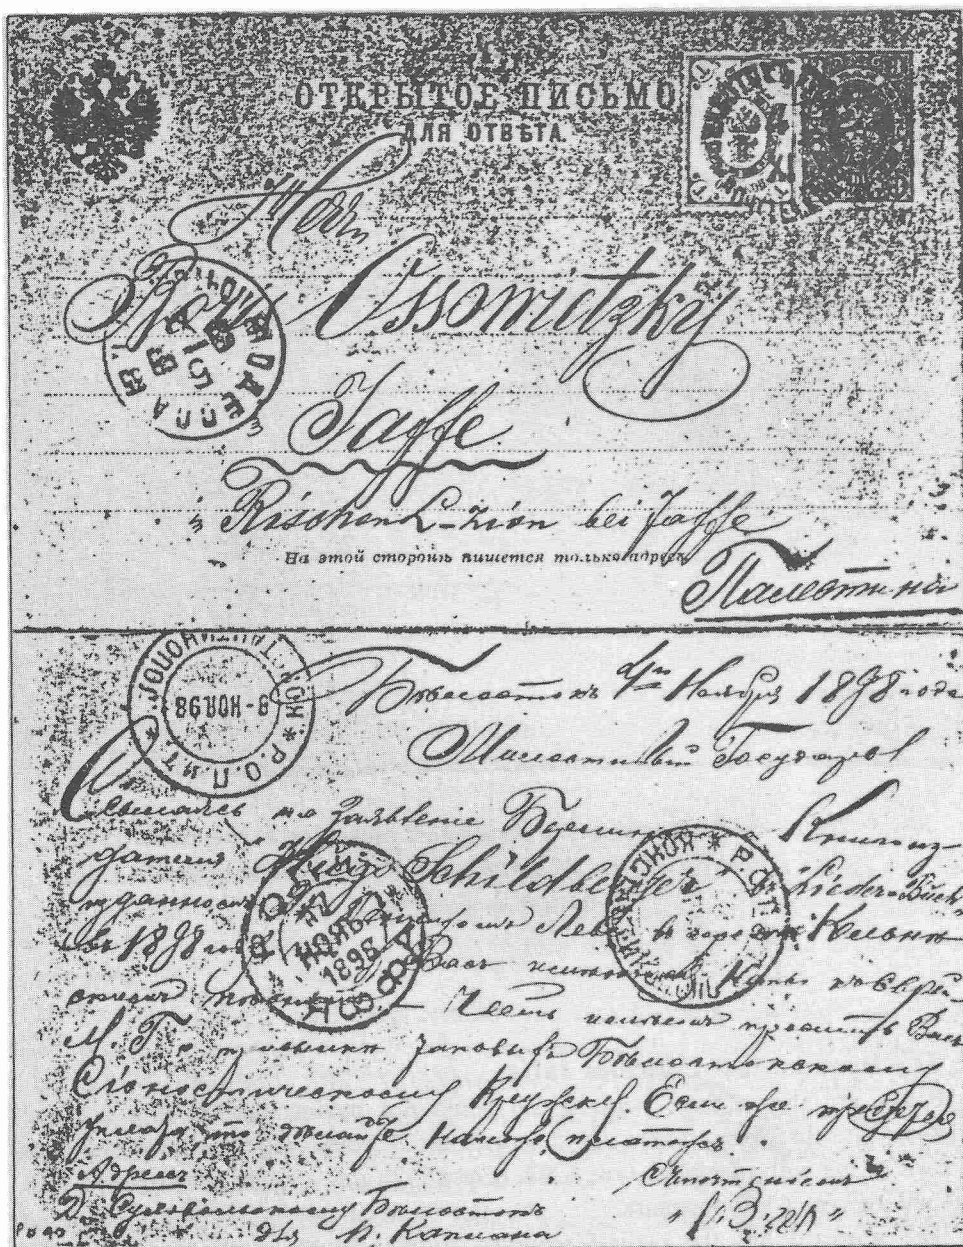

Fig. 6: The face and reverse of a postcard from Russia to Rishon Le Zion, with the only known example of postmark type 629A as a receiving mark; dated 17th November, 1898 (in blue).

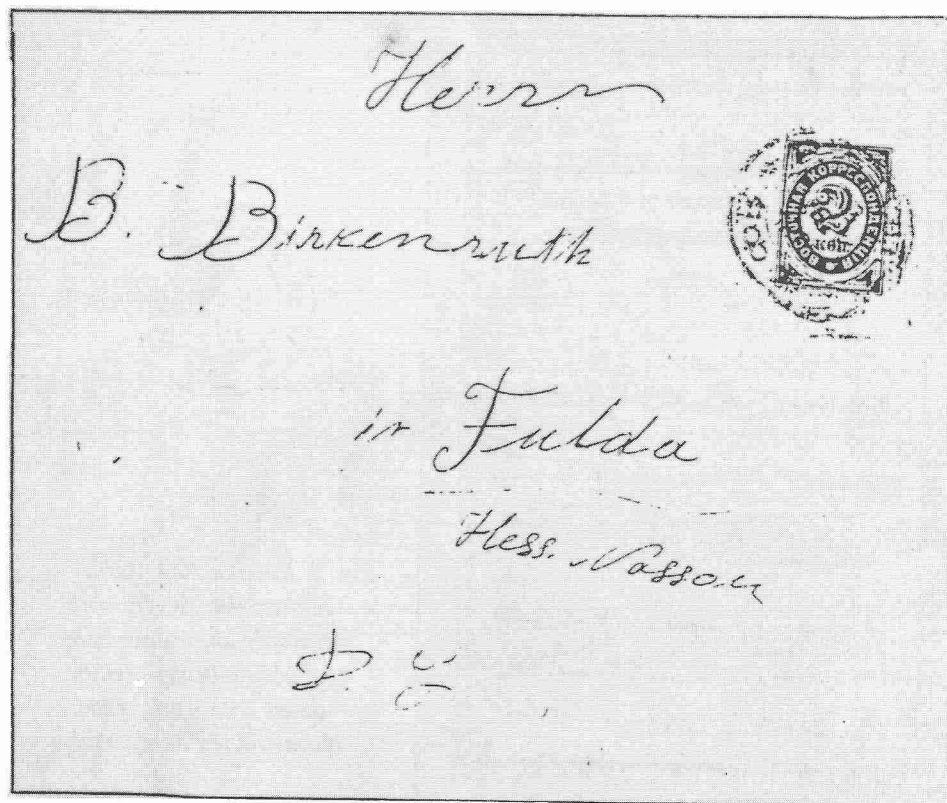

Fig. 7: Cover from Jaffa to Fulda in Prussia, with postmark type 629A dated 23rd December, 1898 (in blue), with transit marks for Constantinople 1st December, 1899 (error in month date), and Odessa of 7th January, 1899.

The registration receipt (Fig. 8) bears the unique type 633B postmark, which has Jaffa at the left and ROPiT at the right. As the violet postmark does not show well, a reconstruction is shown alongside (not actual size). The receipt also has a straight line JAFFA administration mark, which is the only example seen so far.

5. Jewish Colonies – Zichron Ya'acov

In his reference work on the Turkish Post Offices in Palestine, published by Arge Israel in 1980, the late Anton Steichele recorded no registered mail from Zamarin (=Zichron Ya'acov=Zicron Jacob). I was surprised to find, in a Lot purchased from Christie's – Robson Lowe Ltd., an all-Hebrew "registration receipt" cancelled by the Zamarin postmark, Steichele type 52/01, dated 8th September, 1913 (Fig. 9). This item therefore proves that registered mail should exist from Zichron Ya'acov. This is the first all-Hebrew "registration receipt" I have recorded. On p. 429/30 of

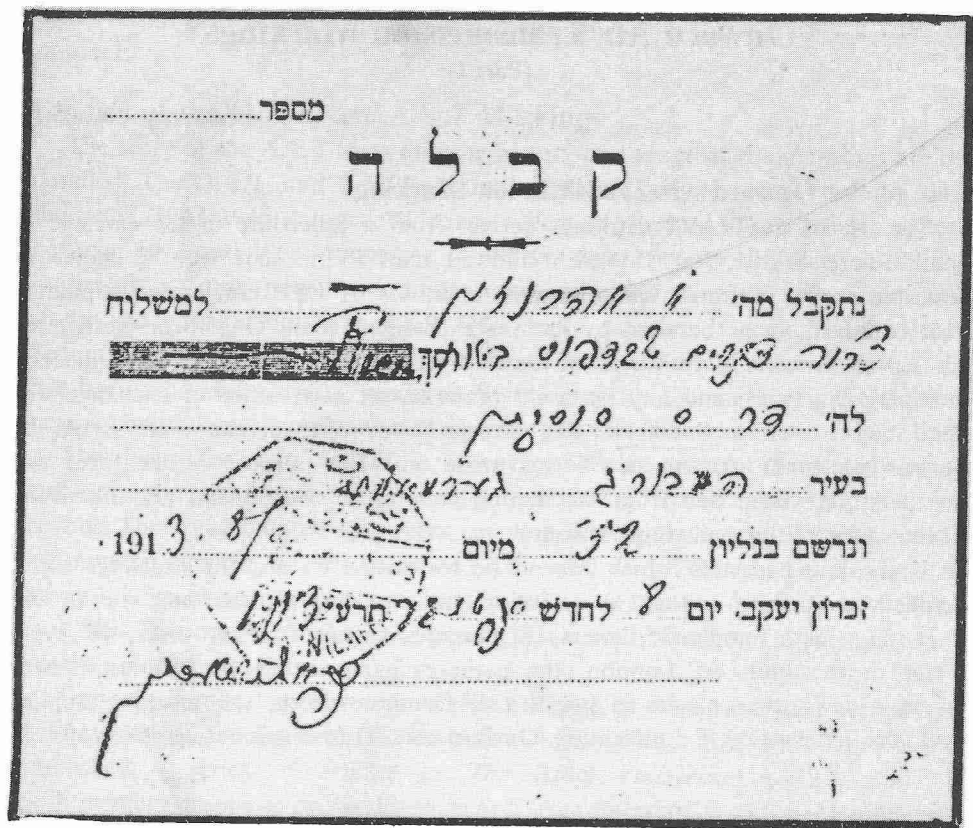

Fig. 9: Receipt for a registered packet from Zichron Ya'acov to Hamburg, Germany, posted on 8th September, 1913 and postmarked "Zamarin (Caiffa)".

Onward Air Transmission Markings*

(Part I)

Murray Keifetz

Use of the Onward Air Transmission Markings

The use of OAT/AV2 markings derives from a procedure in the carriage of mail before World War II which allowed mail to be sent with a choice of multiple modes of transmission between countries. A UPU convention stipulated that standard forms be used by nations exchanging mail. One form, designated as A.V.2, listed the countries of onward destination, weight of each packet, number of articles, and any pertinent remarks. At each office of exchange, the mail bag to which this form was attached was opened, the mail sorted by forward destinations, and new forms made out. The purpose of the form was to identify revenue due from the issuing country to each postal administration for its share of the mail transmission.

If the bag had mail which was to be forwarded by air, the exchange office applied a marking, either to a facing slip attached to the bag, or to the top of a tied bundle of letters, or, in the cases of small units, to every letter in the unit. At London, the main exchange office in Britain, as well as in a few other places in the British Commonwealth, the marking applied was the letters O.A.T., indicating Onward Air Transmission (e.g. Fig. 10). In

Figure 10

* Reprinted from "The Airpost Journal" (Journal of the American Air Mail Society), December 1991.

other postal jurisdictions, the marking used was A.V.2, taken from the UPU form number.

Studies of the O.A.T. and A.V.2 Markings

The story of the A.V.2 form and the history and usage of the markings are quite detailed. The O.A.T. and A.V.2 markings on flown covers – used primarily during the years 1943–1946 – intrigued cover collectors. Several short articles appeared between 1948 and 1962 attempting to explain them, but the difficulty of obtaining information from postal administrations inhibited progress. The first major study and classification was made by Donald Smythe. It was published in the September 1962 issue of *The American Philatelist*. Since that time, while there has been increased interest, study and writing about the markings, there has not been a comprehensive update on their types and classifications.

The basis for this update is a survey of the current literature, auction catalogs, and the direct study of 350 plus O.A.T. covers and 150 plus A.V.2 covers. The total number of covers carrying one or the other of these markings is unknown. Smythe, in 1962, estimated 300 to 400. In 1979, Dickstein estimated 900. Several substantial collections are known, therefore I would estimate over 1,000 up to 1,500. This number makes it apparent that a study based on approximately 500 covers cannot be conclusive.

Two major collectors to whom reference should be made, and their contributions acknowledged, are the late Dr. Leopold Dickstein and “Osprey”. Dr. Dickstein published a series of articles in *The Israel Philatelist* in 1979 and 1980 with primary emphasis on markings to and from Palestine (e.g. Fig. 11), but with a

Figure 11

general introduction of newly reported early and late posting dates and new markings. "Osprey" was the pseudonym of a collector whose airmail holdings were auctioned by Phillips in 1983. There was a major group of OAT and A.V.2 covers, described as the largest known at the time. The section was introduced by a classification system, devised by "Osprey", which differed somewhat from Smythe. Many of the Smythe types were omitted, but a number of others, apparently unknown to Smythe, were introduced. Although conjecture on my part, I have reason to believe that "Osprey" was the noted British collector, A.C.W. Hunter.

I have adopted and modified the Smythe classifications, recognizing that it may not necessarily be the best or most logical possible. It is established and accepted and therefore best not reinvented.

The ultimate goal of this work is the development of a comprehensive monograph which might include early airmail direction markings, postal procedures, marking classification, countries of origin and destination, points of application, statistical information, and perhaps a method of valuation. Information in pursuit of this goal will be appreciated.

Marking Classification

Classification System: Smythe classification, modified.

Dimensions: The outside edges of the rubber stamp imprints, in millimeters.

Dimensions will vary from those shown by up to two millimeters due to strength of impression and condition of rubber stamp.

Colors: Major colors are indicated. Colors may vary due to mixed inks of fading.

Onward Air Transmission

Forerunners of the O.A.T. Markings 1938-1941

A. Manuscript "OAT" notation.

B. Typewritten routing instructions by sender.

C. Rectangular framed instruction.

Known to Australia and several other destinations.

D. Double circular "Air Transit" marking.

Known from Hong Kong, October 1941.

E. KNILM/Trans Tasman/PAA routing instructions.

Various formats known, primarily originating from Netherlands Indies.

F. Printed flimsy attached to envelope.

Known from Australia.

C

*O.A.T. Markings***Type I**

Origin: London
 Used: May 30, 1940–May 29, 1946
 Design: Single line oval
 Square stops after letters (elongated after A)
 Colors: Black, pale red, violet
 Size: 50mm×32mm inclosing letters 42mm×11mm

Type II

Origin: London
 Used: March 26, 1942–1945
 Design: Single line oval
 Square stops after letters, increasing in size
 Vertical slash of right leg of A
 Colors: Black, pale red, violet
 Size: 52mm×33mm inclosing letters 41mm×11mm

**Type III**

Origin: London
 Used: September 27, 1944–January 5, 1945
 Design: Single line oval
 Square stops after letters, increasing in size
 Vertical slash on right leg of A
 Crossbar of T thickens at right
 Colors: Pale red, violet, black
 Size: 55mm×35mm inclosing letters 43mm×12mm

Type IIIA

Origin: London
 Used: March 7, 1944–June 1945
 Design: Similar characteristics to Type III
 Size: 62mm×40mm inclosing letters 49mm×14mm

III

IIIa

Type IV

Origin: London

Used: April 5, 1944–May 1946

Design: Single line oval

Square stops after letters, increasing in size

Small vertical slash on right leg of A

Colors: Red, violet, black

Size: 65mm×42mm inclosing letters 51mm×14mm

IV

Type V

Origin: London

Used: May 7, 1945–September 24, 1945

Design: Single line oval

Square stops after letters

Small vertical slash on right leg of A

Smeared impressions of portions of base between letters and frame line

Colors: Light red

Size: 65mm×45mm inclosing letters 55mm×15mm

V

Type VI

Origin: London

Used: May 2, 1945–October 1945

Design: Broken rough (mutilated?) rectangular frame

Colors: Light red

Size: 56mm×36mm inclosing letters 50mm×16mm

VI

Type VII

Origin: London

Used: July 12, 1945–March 1946

Design: Rectangular frame (straight lines, wavy lines or lines with breaks)

Round stop after O

Square stops after A and T

Colors: Light red

Size: 32mm×17mm inclosing letters 27mm×7mm

Type VIII

Origin: London
 Used: October 1945–January 1946
 Design: Likely distortion of Type V
 Vertical extension of square stop after T
 Colors: Pale red
 Size: 33mm×18mm inclosing letters 28mm×9mm

Type IX

Origin: London
 Used: October 1945–November 22, 1946
 Design: Rectangular frame
 Round stop after O
 Square stops after A and T
 Colors: Pale red
 Size: 37mm×20mm inclosing letters 31mm×8mm

Type X

Origin: London
 Used: October 1945–1946
 Design: Likely distortion of Type IX
 Vertical extension of square stop after T
 Usually a break in the top frame line
 Colors: Pale red
 Size: 36mm×21mm inclosing letters 31mm×9mm

Type XI

Origin: London
 Used: March 1945–November 21, 1946
 Design: Rectangular frame
 Narrow rectangular stops after letters
 Colors: Pale red, black
 Size: 32mm×19mm inclosing letters 26mm×10mm

Type XII

Origin: London
 Used: April 1946–May 1946
 Design: Rectangular frame
 Rectangular stops after letters
 Colors: Pale red, black
 Size: 38mm×22mm inclosing letters 31mm×12mm

**Type XIII**

Origin: Prestwick
 Used: November 10, 1941–February 26, 1946
 Design: Unframed letters
 Diamond shaped stops after letters
 Colors: Light violet, red
 Size: 37mm×10mm

Type XIV

Origin: London
 Used: August 1948–January 20, 1957
 Design: Single line oval
 Two lines of letters: OAT and FS
 Small rectangular stops after letters
 Colors: Violet
 Size: 29mm×16mm inclosing letters 18mm×10mm

Type XV

Origin: Tangier
 Used: August 1948–September 1946
 Design: Unframed letters
 Square stops after O and A, no stop after T
 Colors: Violet
 Size: 37mm×9mm

**Type XVI**

Origin: Tangier

Used: August 2, 1944–March 30, 1956

Design: Double line oval

Square stops after letters

Colors: Violet

Size: 32mm×20.5mm inclosing letters 21mm×5mm

Type XVII

Origin: Hong Kong

Used: September 29, 1941

Design: Unframed letters

No stops after letters

Colors: Unknown (Photocopy only seen)

Size: 18mm×7mm

Type XVIII

Origin: London

Used: September 14, 1951–December 13, 1965

Design: Rectangular frame

Two lines of letters: OAT and FS

Small rectangular stops after letters

Colors: Violet

Size: 26mm×14mm inclosing letters 18mm×10mm

Type XIX

Origin: Amman, Jordan

Used: January 2, 1962

Design: Single line oval
 Two lines of letters: OAT and FS
 Square stops after letters
 Vertical line intersecting left part of oval
 Colors: Violet
 Size: 32mm×20mm inclosing letters 20mm×11.5mm

From China to Rehovot, 1940–1948

Ehud Jungwirth, Rehovot

Some time ago I obtained the correspondence between a resident of Rehovot and his family. The first had left Germany for Palestine in early 1939, while the rest of his family went to China, where his mother and various other relatives settled in the International Zone of Shanghai, and an uncle – a physician – and his wife made their way to Peking. Unfortunately, although there were lots of envelopes and postcards, all of the stamps and most of the postmarks had been removed many years ago. Nevertheless, the remaining parts of the envelopes are of great interest both philatelically, and from a human point of view. This article will deal only with the first aspect of this correspondence and show some items which arouse certain questions, and others which contribute to our understanding of the postal links to Israel during the turbulent times of May/June 1948.

a. The Period 1940–1942

Mail during this period was mainly sent by sea, a letter (plain or registered) taking about two months. Figure 12 shows the reverse side of a registered

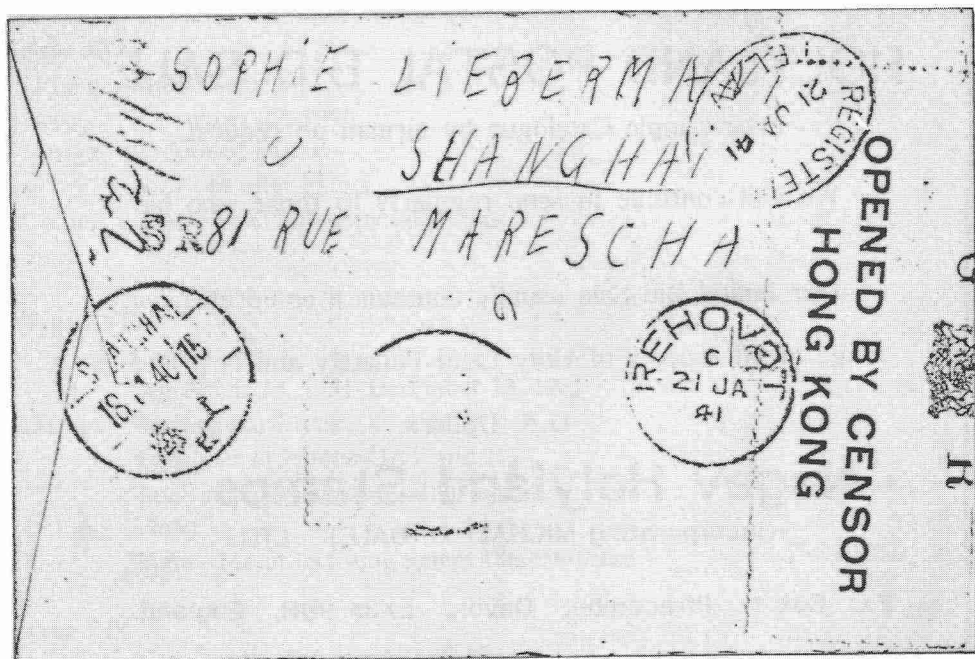

Figure 12

letter dated Shanghai 18.11.40 which arrived in Tel Aviv on 21.1.41 having been censored in Hongkong. Others were censored in Singapore. It would appear that mail-despatch during this period was erratic, as shown by remarks in letters, e.g. "today mail leaves for Palestine... the newspapers always announce this" or "today I read that mail to Palestine will leave again by ship via Colombo (then the capital of Ceylon, today known as Sri Lanka - E.J.) Australia, Africa and Egypt.

This period marks the entry of Italy into WW II (in September 1940). Figure 13 shows the reverse of a letter from Peking (the letter itself is dated

Figure 13

1.8.40, but the stamp and despatch postmark were removed). It was routed via Italy, arriving there after that country had joined Germany as the second Axis Power. It was censored there, marked (in French) "Service suspendé / return to sender" and was returned to China (Tientsin postmark, dated in Chinese only). Then it was reposted via Egypt (Cairo postmark of 22.3.41 and censorship) and reached Rehovot on 27.3.41, after an eight months' journey! It also was censored in Palestine (label). Figure 14 shows the same cover with the actual letter, showing the date of writing and with the Palestine censorship label peeled back to expose the Italian censorship label stating "verificato per censura" and their cachet.

Figure 14

Figure 15

Figure 15 is the front of this cover showing the reposting date (in Chinese only) of Shanghai, the “return to sender” cachet in French and another cachet of the Egyptian censorship department. It also shows a rubber stamp in English (applied in Palestine?) requesting that the sender be asked to state the language in which the letter is written and his/her full address – all that in spite of the fact that the language (German) is clearly stated. All in all, a remarkable cover.

The next cover, shown in Figure 16 (back and front) is something of a mystery. This cover did not contain the actual letter, hence the despatch date cannot be ascertained, but since it arrived in Rehovot in January 1941 it must have been sent sometime in 1940. This letter was routed – one wonders why – via Germany, was opened and censored by the Oberkommando der Wehrmacht (both labels and (red) censorship cachets), and – why and how? – **forwarded to Palestine** where it was duly censored and delivered. A curious case of German correctness in times of war!

Only a very few letters during this period had been sent by airmail. One I could find was marked: K.L.M. Airmail via Batavia* – Lydda. Another was via K.L.M. from Singapore, where it was censored and taxed (but tax was not collected in Palestine).

This period also saw the Japanese conquest of Hongkong (25.12.1941) and then of Singapore (15.2.1942) so that it was no longer possible to write to Palestine via this route nor via the now occupied Dutch East Indies. Figure 17 shows the front of a postcard from Peking dated 7.11.1931 (sic) – the actual message is dated 6.11.1942 – clearly marked: Via Siberia–Turkey–Ankara.

b. The Period 1943–1948

During this period it appears that only Red Cross messages were passed to and from Shanghai, of which I found only one. This was a very drawn-out affair as can be seen from these dates: Despatch Rehovot, 3.7.1943; transit Geneve, 29.7.1943; no date of arrival in Shanghai (violet cachet of Red Cross, Shanghai, only); no date of redespach; transit Geneve, 19.5.1944 and finally Jerusalem / Postage paid, 13.8.1944 – more than a whole year!

c. The Period after World War II

Regular airmail services were resumed after the end of the war. The latest of such covers in this correspondence to arrive in Palestine bears the Lydda Airport (registered) postmark of 9.4.1948 and that of Rehovot of 11.4.1948. Two weeks afterwards the British authorities and their counterparts abroad suspended all official postal services to Palestine. Very much has been written in this and other publications about the various unofficial postal services

* Then the capital of the Dutch East Indies – now Jakarta, the capital of Indonesia.

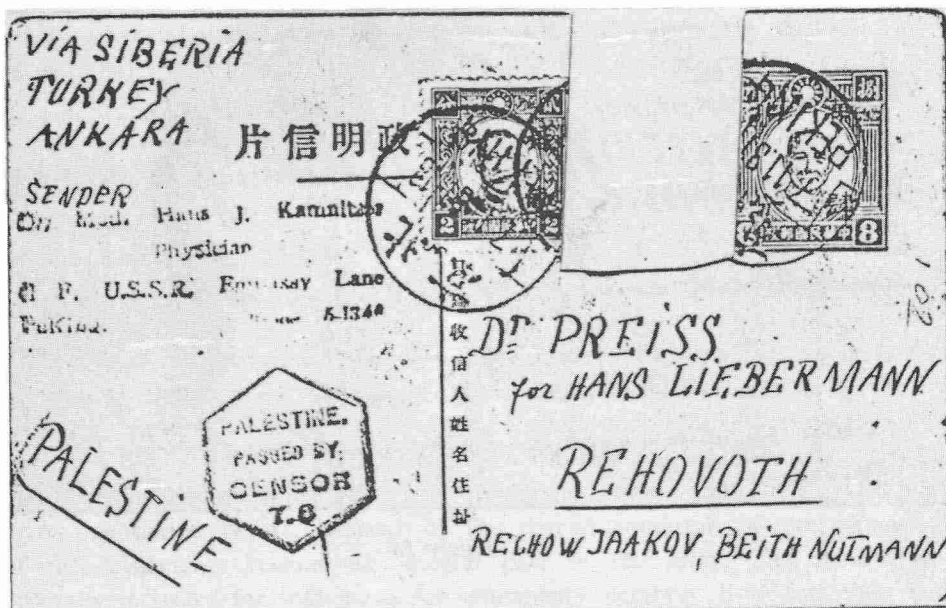

Figure 17

from and to Palestine and the U.S.A. and Europe. The correspondence under review here provides us with another such unofficial link.

Figure 18 shows the top of a letter dated 14.5.1948 sent to Rehovot via the H.I.A.S. (Hebrew Immigrants Aid Association, based in the U.S.A.), bearing the (undated) HIAS cachet: "Far Eastern Jewish Inform. Bureau "HIAS", P.O.Box 1425, Shanghai", and the arrival cachet (in Hebrew and English): "HIAS Eretz-Israel / HIAS - Palestine", dated 15.6.1948. It should be pointed out that such letters were apparently sent in bulk, i.e. without envelopes, as the typewritten "From/To" at the top and the applied cachets indicate. I presume that the accumulated letters were then sent by P.E.D.I., but there was nothing in this correspondence to prove this point. Readers are requested to supply additional data, if available.

The second HIAS letter in this correspondence (Fig. 19) is undated by the sender but bears the HIAS arrival cachet of 21.6.1948, so it should have been sent one week after the first, i.e. about 21.5. The first sentence of this letter reads: "Your little letter postmarked 1st May just arrived via Cyprus"!! Unfortunately, the correspondence under review does not contain material to Shanghai, to show the route of this letter.

Reading this correspondence, even sans stamps, has again shown to me just how much history, and not just postal history, can be learnt by a careful survey of such material, together with a little detective-work!

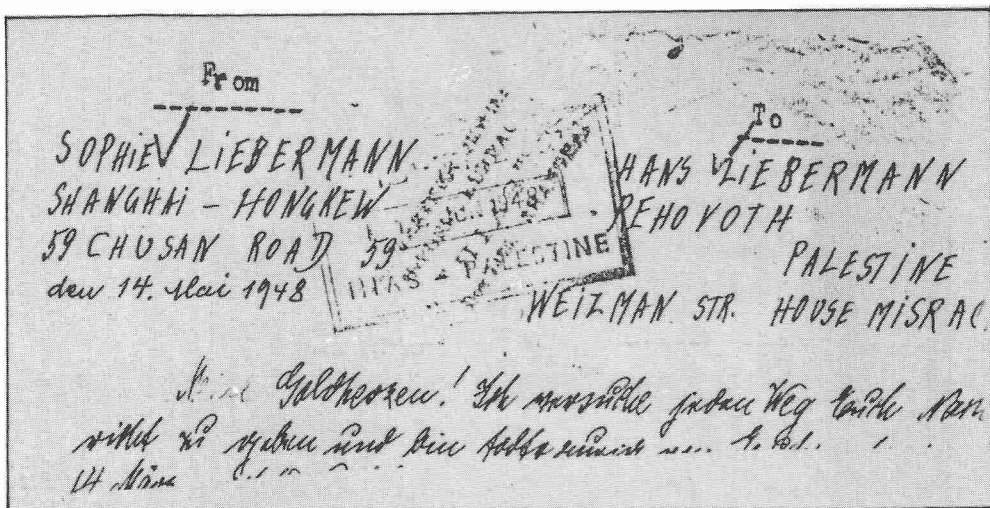

Figure 18

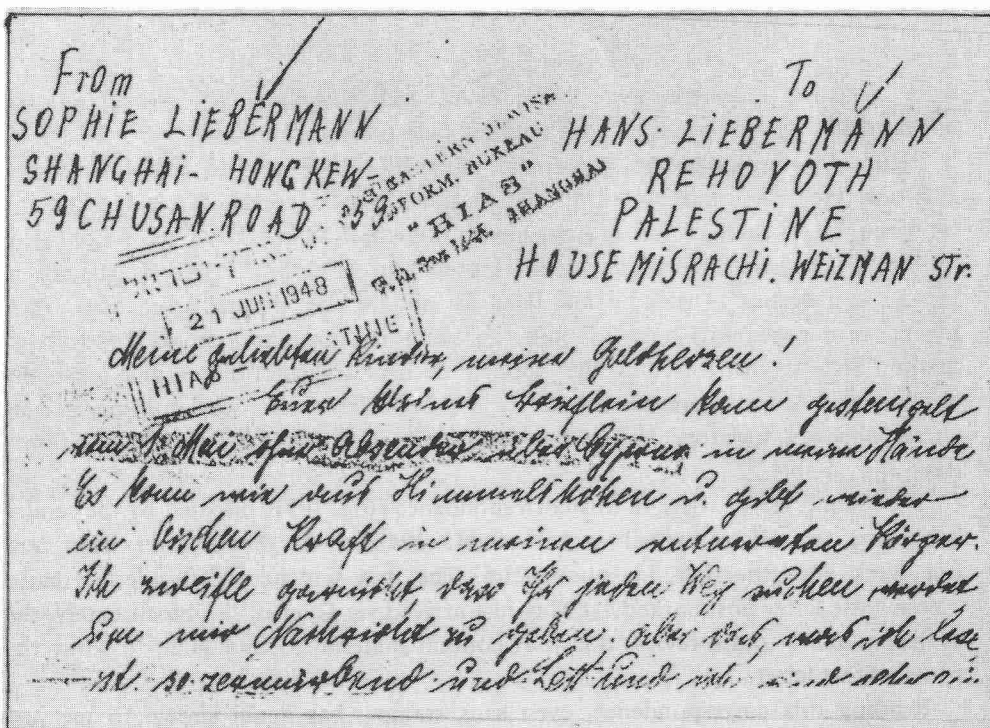

Figure 19

The Postal Services to the Negev Settlements during the Mandate Period and the Army Postal Services to the Negev during the War of Independence

(Part III)

A. Zakai, Beer Sheva

28 June – end of August 1948

On 28 June, 1948 Army Post Office (APO) No. 10 was opened at Ruhama, next to the Negev Brigade Headquarters.

The Negev, for the postal services, was now divided into two main areas, similar to the military zones (see Fig. 18 in Part II of this article*). The Northern area of the 2nd Battalion received KBA No. 219, and the Southern area, that of the 8th Battalion, got KBA 225. The Negev Brigade received KBA 279, the 7th Battalion, KBA 224 and the 9th Battalion, KBA 280.

As mentioned before, because of the special condition of the Negev, all of the settlements became an integral part of the army. The same postal orders were issued for soldiers as for settlements members. Both sent their mail free of charge through the army post office in Ruhama.

As the army units and the settlements were dispersed in a very big area, subnumbers were issued to them. In the 2nd Battalion's area the subnumbers were 219/1 to 219/27 and were given at random to army units and to settlements. These for the settlements were**:

219/7 Nir Am
219/10 Brur Chayil
219/11 Dorot
219/12 Saad
219/13 Beerot Yizhak
219/15 Kfar Darom
219/16 Gevim
219/17 Beeri
219/18 Tekuma
219/22 Gvar Am
219/23 Ruhama
219/24 Mishmar HaNegev
219/25 Shual
219/26 Chatzerim

13 subnumbers were given to army units in this area; these will be detailed in Part IV of this article.

* Continued from HLP# #48, pp. 380–390.

** See also Table 1, Column B, in the end of the article.

In the 8th Battalion area the subnumbers were 225/1 to 225/25, but here they were given in numerical order – the first 12, 225/1 – 225/12, to army units and the rest, 225/13 – 225/25, to the settlements**:

225/13 Beit Eshel

225/14 Nevatim

225/15 Nirim

225/16 Gvulot

225/17 Zeelim

225/18 Chalutza

225/19 Urim

225/20 Revivim

225/21 Mivtachim

225/22 Ramat HaNegev

225/23 Imara Police St.

225/24 Asluj Police St.

225/25 Asluj

In the original article on the army postal services by Kanner & Spiegel¹, a big mistake occurred. The authors did not realise that part of the subnumbers were given to army units and they ascribed all of them to the settlements. This mistake probably arises from the fact that part of the army units were stationed near to the settlements; for instance, the 2nd Platoon of Company "A" of the 8th Battalion was called also "Gvulot Platoon", but it was allocated KBA No. 225/4, while the settlement Gvulot received No. 225/16.

The opening of the army post office in Ruhama helped organize the postal services inside the Negev, but did not help to bring more mail from the Israeli central region. Only mail brought by light airplanes which landed at the Dorot airfield could be handled.

Occasionally, convoys were organized to cross the Egyptian lines with the help of the U.N. units, but without success. Only on 31 July a large convoy crossed the lines. In this convoy many parcels were sent to soldiers and members of the settlements, which were despatched much earlier and we can find despatch dates even from April. Figure 20 shows a parcel card sent from Rishon LeZion (Mandate double circle postmark) on 30 June, with transit cancel of Tel Aviv, 5.7.48. It has an arrival postmark of APO 10 (Ruhama) of 1 August, and was delivered by a unit postal messenger on the next day. All of the parcel cards from this first consignment have arrival postmarks of 1 August and most of them were despatched from APO 10 to the units and settlements on the next day. For some reason the day slug "2" was not inserted in the circular datestamp, so that all these datestamps have handwritten dates.

** See also Table 1, Column B, in the end of the article.

28.1948

Date

Fig. 20: A parcel card from Rishon LeZion, 30.6.48, received in Ruhama APO 10 with the first convoy which reached the Negev. It has the arrival postmark of 1.8.48 and was delivered by a unit messenger on the 2nd. Note that the "2" in the second postmark is handwritten.

The letters written by settlements members were first delivered to one of the Battalion Post Offices (KBA 219, 225, 224 or 280), where they received the triangular KBA mark, then being transferred to APO 10 at Ruhama from which they were sent by airplanes to the north.

Figure 21 shows a letter sent by a member of Kvutzat Nir Am, as seen from the address 219/7, with postmark APO 10, dated 15.7.48, and triangular violet KBA 219 (HQ of the 2nd Battalion). On the left there is the Hebrew inscription "passed examination" (censored).

Figure 22 shows a letter sent by a member of kibbutz Dorot (KBA 219/11), sent through unit KBA 224 of the 7th Battalion, since this unit was stationed close to the settlement.

Figure 23 shows a unique letter, sent by a member of kibbutz Beerot Yizhak (KBA 219/13), through KBA 219 of the 2nd Battalion to P.O.B. 342, which was the post office box of Beerot Yizhak in Tel Aviv. This letter was sent by a member staying in his settlement in the Negev to his evacuated family living somewhere in central Israel (as mentioned before). Beerot Yizhak's families settled in the ex-German village Wilhelma as their new provisional home.

Fig. 21: Letter sent by a member of kvutzat Nir Am (KBA 219/7) through the 2nd Battalion postal unit, (hence the triangular "KBA 219") and then via APO 10 at Ruhama to Tel Aviv.

Fig. 22: Letter sent by a member of kibbutz Dorot (KBA 219/11) through the 7th Battalion postal unit (hence the triangular "KBA 224") and then through Ruhama APO 10 to Haifa.

Fig. 23: A letter from Beerot Yizhak in the Negev (KBA 219/13) through the 2nd Battalion postal unit ("KBA 219") to Tel Aviv P.O.B. 342, the post office box of Beerot Yizhak there.

Figure 24 shows a letter sent by the committee of the group of the Negev settlements in Ruhama to the commander of the army post. The envelope was reused many times for economy reasons.

Figure 25 shows a letter sent from a settlement in the Negev to a member in kibbutz Mishmar HaNegev. It is franked by a 10 mil Doar Ivri stamp (rouletted), cancelled "APO 10, 13.08.48" and arrival postmark of 14.8.48. The sender obviously did not know that he could send letters without stamps.

Fig. 24: Letter sent by the committee of the Negev settlements to the manager of the army post. The envelope was later reused, according to the prevailing practice.

Fig 25: A letter with a stamp, sent locally inside the Negev. The sender probably did not know that settlement members in the Negev were exempt of postage.

As the situation in the Negev worsened, Ben Gurion gave orders to pay more attention to the situation there. As a result, airfields were built near Revivim, Urim and Nevatim. The supply of food and ammunition became easier soon afterwards.

But the major breakthrough was the opening of the large airfield next to Ruhama, when on the night between 22 and 23 August operation "AVAK" started. Thousands of tons of supplies were transported at night, flown over the Egyptian lines. It changed the whole situation.

At the same time, the Negev Palmach Brigade, which participated in all of the fighting in the Negev from the very beginning in December 1947, was sent to recover in the north and was replaced by the Yiftach Palmach Brigade. The change was carried out, as the soldiers of the Yiftach Brigade crossed the Egyptian lines at night from north to south and the Negev Brigade soldiers were sent northwards in the empty returning aircraft.

The opening of the Ruhama airfield caused the normalisation of the whole postal services in the Negev area.

Figure 26 is a "Road Certificate" which shows that a mail consignment was sent with "ATA" (Agaf Tovalah Avirit = Air Transport Division) from Ruhama (APO No. 10) to APO "Base A", Tel Aviv, through APO 9 - Eqron airport. The consignment was despatched at 20.00 and received in Eqron at 22.30.

The "APO 10" circular datestamp was damaged after a short time; it is known as Negev datestamp Type I. As stated by Kanner & Spiegel in their BAPIP articles, the new instrument (datestamp) was put into use between the dates 27th-30th August. Here we have evidence, that the new datestamp came into use

Fig. 26: Road Certificate, after the opening of the Ruhama airfield, which shows that a mail consignment was sent from Ruhama APO by "ATA" on 27.9.48, received at Eqron airfield (APO 9) and delivered to APO "Base A", Tel Aviv.

on 29 August. Figure 27 shows a telegram sent from Tel Aviv on 25.8.48, transferred to army post “Base A” (Tel Aviv) on 26.8.48, arrived at APO 10 on 28.8.48 and transferred to Mishmar HaNegev (KBA 219/24). This “APO 10” postmark is of Type I and it was the last day that this type was used, as we can see that Figure 28 already shows a registered letter from 29 August with the new Type II*.

End of August – 24 October 1948

As mentioned before, the Negev Palmach Brigade was replaced by the Yiftach Brigade. The commanders of the Negev Brigade Post Office took with them the triangular handstamps of all the units (KBA 219, 224, 225, 279, 280) and only on 10 September were new handstamps supplied.

Fig. 27: A telegram sent from Tel Aviv to Mishmar HaNegev (APO 219/24) on 25.8.48 via APO "Base A". It reached APO 10 on 28.8.48. This was the last day that the Negev circular datestamp (APO 10) Type I was used. (The dark insert on the bottom is a reproduction of the two postmarks from the envelope of the telegram).

* The main differences between the two types are as follows: Type I – diameter 23mm, small “rosettes” at the sides and somewhat smaller letters; Type II – diameter 24.5mm, bigger “rosettes” and larger letters.

Fig. 28: A registered letter from APO 10 sent on 29.8.48, showing the first day of the Negev datestamp of Type II.

All the settlements received new KBA numbers (see Table 1, Column C): KBA 379/1 to 379/27 (nobody got /24 and /26), except for Beit Eshel which received KBA 377 (s. Fig. 29), and Nevatim which received KBA 378. Yiftach Brigade commanders did not mix settlements postal numbers with their unit numbers, as occurred during the Negev Brigade command.

The Yiftach Brigade HQ used KBA 277, the First Battalion – KBA 218, and the Third Battalion – KBA 220. The Brigades HQ as well as the postal office stayed at Ruhama.

Figure 30 shows a postcard sent from Romania to a member in Beit Eshel in October, and the civilian postal authorities added in manuscript “Army Post 377, Israel Defence Force”. Figure 31 shows an envelope with a greeting card, sent from kibbutz Beerli (KBA 379/12) through KBA 220 (in violet) – the post office of the 3rd Battalion – then through APO 10 to Haifa.

In operation “YOAV”, 15–21.10.48, the Egyptian lines, which cut off the Negev for four and a half months, were broken and the road to the Negev reopened. On 21 October, Beer Sheva was conquered. On 24 October the airforce supply line to Ruhama was suspended and the postal services were conducted by road transport.

Fig. 29: A letter from Beit Eshel, bearing the very scarce triangular “KBA 377”.

Fig. 30: A postcard from Romania to Beit Eshel, transferred to “Army Post 377”, which was the KBA number of Beit Eshel in the Second Period.

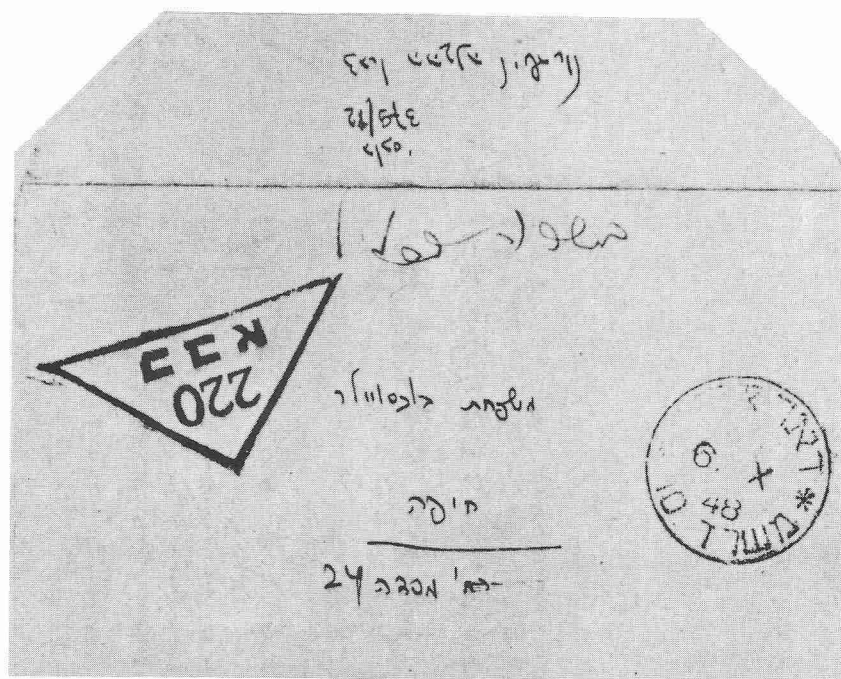

Fig. 31: An envelope of a greeting card from kibbutz Beeri (KBA 379/12) to Haifa, via the 3rd Battalion post office (KBA 220) and then APO 10.

24 October 1948 – 10 February 1949

On 7 November, Army Post Office (APO) No. 1 was opened at Beer Sheva. This office served, other than the army units in the area, all of the settlements south and east of Beer Sheva. APO 10 in Ruhama continued to serve the settlements and army units in the northern and western Negev. It was transferred from Ruhama to Julis on 26 December, 1948.

During this period, three military operations were launched: operation "Lot" – to reunite the south Dead Sea area and Sdom to the state; operation "Assaf", to push the Egyptian units out of the western Negev; and the largest operation "Chorev" – when the I.D.F. drove the whole Egyptian army out of Israeli land and penetrated for the first time into the Sinai peninsula.

Figure 32, where a soldier used an envelope of an Arabic Nationalistic Organization, found during the taking of Beer Sheva, has the postal address of kibbutz Shuval (KBA 379/7) as a return address. The letter was censored, as per the Hebrew handwritten note on the bottom right. Figure 33 shows a letter sent by a member of Mishmar HaNegev (KBA 379/8), sent through KBA 218 (1st Battalion) and then via APO 10 to Haifa.

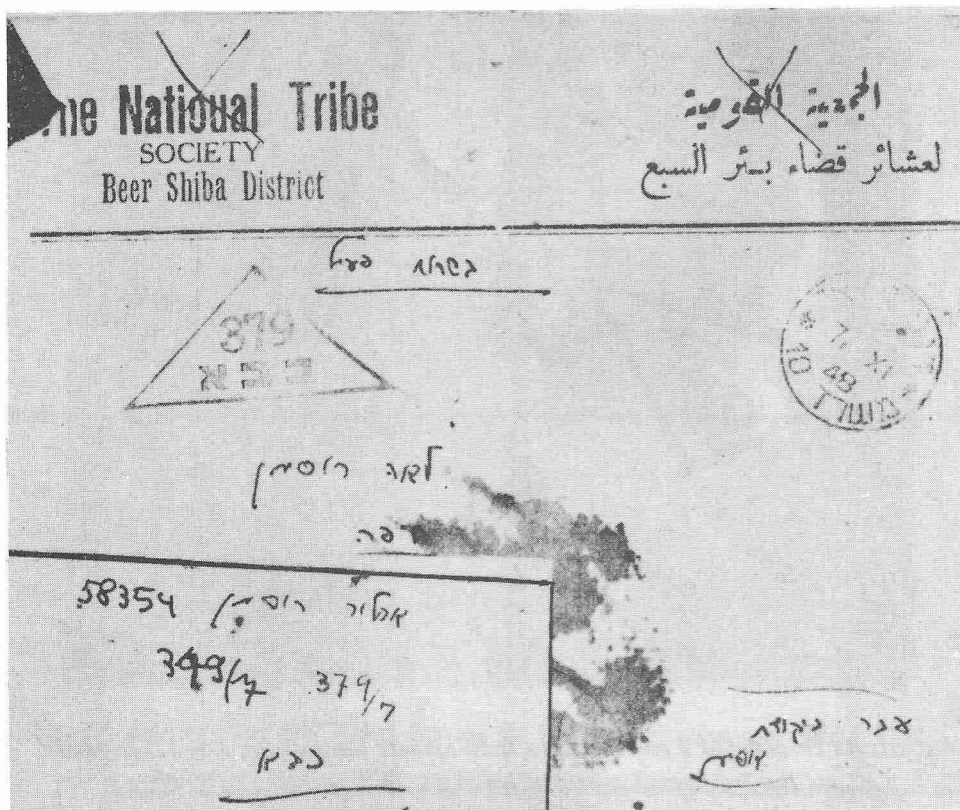

Fig. 32: A letter from kibbutz Shuval (KBA 379/7) via KBA 379 and APO 10. The writer used an envelope of an Arabic Nationalistic Youth Organization, which was found on taking Beer Sheva.

On 10 February 1949, use by civilian settlements of the army postal services was suspended.

After 10 February 1949

At the beginning of March 1949, operation "Uvda" took place and the whole Southern Negev area was liberated, up to the Gulf of Eilat.

With the suspension of the army postal services to the civilian settlements, and without governmental postal services in its place, the settlements had to renew the old system of using post office boxes in Tel Aviv, bringing their mail with the supply cars. The post office boxes were in use until the Negev Mobile Post was established. Figure 34 shows a postcard sent from Belgium on 27.7.49 to kibbutz Mishmar HaNegev, via P.O.B. 2643, Tel Aviv.

Fig. 33: A letter from Mishmar HaNegev (KBA 379/8) to Haifa, through the 1st Battalion post office (KBA 218) and then to APO 10.

In Beer Sheva, one person, a Mr. Haviv Shieber, tried to organize a private post, which worked for a few days only, when he was stopped by officials as being illegal². However, it speeded up the opening of a civilian post office in the town, which was opened on 14 June 1949.

(To be continued)

Fig. 34: A postcard from Belgium, 27.7.49, to Mishmar HaNegev, "P.O.B. 2643, Tel Aviv". When the army postal service to the civilian settlements was suspended, they had to again use their POB's in Tel Aviv, until the Mobile Post began its service.

Klussendorf Vending Machine Postage Labels in Israel – an Update

N. Phereshevsky, Jerusalem

Introduction

The Klussendorf era in Israel started on 9.7.90, with 21 machines¹. These machines have cliché numbers, unlike the Frama machines in this country. The combination of cliché number and paper type (as will be detailed later) is the essence of Klussendorf labels collecting.

The two-years experience gained with Klussendorf machines here shows that they tend to become inoperative much more than the Frama machines. However, the main reason for that might be us collectors – it seems that we use (or abuse?) these machines much more than the general public. The number of commercial covers franked with Klussendorf labels that one encounters is relatively small. A Few examples are shown: Fig. 35 – current basic rate of 0.75

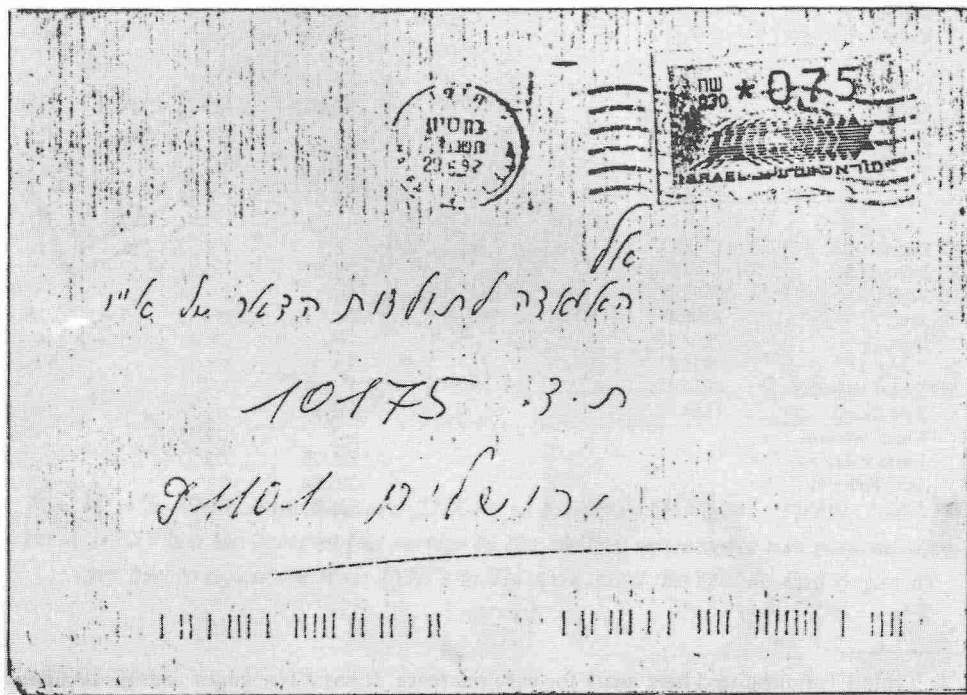

Fig. 35: Commercial use of ATM – local standard letter, 0.75.

from Haifa (030). Fig. 36 – a second step letter (up to 100 gr.) with “mixed franking” totalling 0.90, from Tel Aviv Sorting Centre (003)*. Fig. 37 – a registered letter, one label of 2.35, from Ashdod (021)*. It should be noted that this last cover is a business reply mail, which means that the sender should have paid only the registration extra (1.80).

Cliche Numbers

The printing mechanisms of the Klussendorf machines, which have the cliche number, are interchangeable. The Israel Postal Authority has 45 cliches, and all of them have already been in use. The machine which is located at the Philatelic Service in Jaffa has no cliche number, and is also different in other aspects. The rarest cliche number is 039, which was in use for only a few hours on 19.2.91 in Qiryat Ata. The following list details the history of cliche numbers.

Fig. 36: Commercial use of ATM – “mixed franking” on an “up to 100 gr.” letter, 2x0.05 + 80 Ag.

★ These were the proper rates in the period 1.5.90–1.12.90.

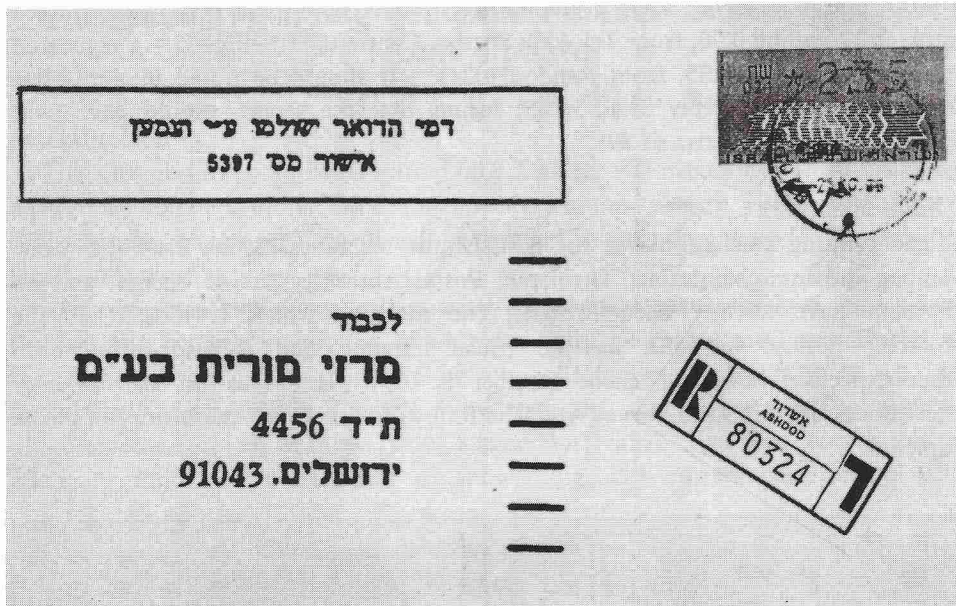

Fig. 37: Commercial use of ATM – an inland registered letter, 2.35.

List of Klussendorf ATM's in Israel as of 8.7.92

Notes:

1. #16e was not listed in the original Post Office Public Notice.
2. #16d was used for the official FDC, and is used now by the Philatelic Service to fill orders.
3. Cliche 039 was in the Qiryat Atta machine on 18.2.91 but functioned less than a day and was replaced by 015 the following day.
4. Cliche 005 that was reported to be in 6b was in fact cliche 001.
5. #19 is not accessible to the public, only to employees.

Paper Classification

It is important to clarify the term "paper" which is popular amongst ATM collectors. The "stamp" is the part that is printed by the machine (value and cliche number), and "paper" is therefore the roll of paper that the machine prints on, **including the design** on it.

The classification of paper types is based on the shades of the background (grey), stag (red) and Magen-David (blue). Collectors here adopted a five-types system, as follows:

- 1 – very dark grey, dark blue. This is the paper that was first used.
- 2 – dark grey, dark blue. Also, the letters "שח" in the upper-left corner are 4mm from the left edge. The right line of the "shin" hits the top edge of the left of the hole. In all the other papers, that line hits the hole in the middle (Fig. 37a).
- 3 – light grey, light blue.
- 4 – dark grey, dark blue, but "שח" is not shifted as in (2).
- 5 – This is the "Israeli" paper; light grey, light blue, with the phosphor bar left-justified. The paper is thicker and the gum is mat and it has no control number on the back.

It should be noted that Klaus Salten defined 10 types (excluding the Israeli paper), based on finer shades².

Only the combination of paper and cliche number determines the rarity of a label, because it may happen that a cliche that was used for a short time once is re-introduced, but this time on another paper; an example for that would

Fig. 37a: Type 2 paper ("שח" shifted to left) as compared to its position in other types (right).

be 023. On 9.7.90 it was in use in Beit HaKerem, Jerusalem, but was removed after only two days. Almost a year later it showed up again in Yavne. The 023 labels printed on paper 1 are rare, but on papers 4, 5 they are common. Presently the Israeli paper is used, but in some places there are still stocks of "older" papers.

The following table shows the existing combinations of paper-cliche number, as far as I know.

Table of Existing Paper-Cliche Combinations as of 8.7.92

| | 1 | 2 | 3 | 4 | 5 | | 1 | 2 | 3 | 4 | 5 | | 1 | 2 | 3 | 4 | 5 |
|-----|---|---|---|---|---|-----|---|---|---|---|---|-----|---|---|---|---|---|
| 001 | x | | x | x | x | 016 | x | x | x | | x | 031 | x | | x | x | x |
| 002 | | x | x | | | 017 | | | x | x | x | 032 | x | x | x | x | x |
| 003 | x | x | x | | x | 018 | | | x | x | x | 033 | x | x | x | x | x |
| 004 | x | x | x | x | x | 019 | x | | x | x | x | 034 | x | x | x | x | x |
| 005 | | | x | x | x | 020 | x | x | x | x | x | 035 | | x | x | x | x |

| | | | | | | | | | | | | --- | x | x | x | x | x |

Variations and Errors

"Variations" are paper variations that are caused due to flaws in the plates during the design printing. These are constant flaws, similar to those familiar from stamps. They are usually not easily seen, and one has to be a specialist to collect them. Shown here (Fig. 38) is the "three dots" variety, that can be found on one sub-type of paper 3, on every 11th label. Near the lower-left corner there are three grey dots, in an arc. Other known varieties: the "blob in Magen-David" and "Ben-Hador" (the designer's name, along the left edge, missing part or the whole of his first name "דוד"), both appear on paper 5.

Fig. 38: "Paper" variety – arc-shaped dots on bottom left of label.

Errors, which are the most interesting things to find, are labels that are produced as a result of machine malfunction. They can be grouped in categories, according to "what went wrong". Some examples:

Multiple printing – When the label get stuck in the printing area and the printing head prints on it several times. Fig. 39 (left) shows a label with one normal strike and parts of three more.

Offset printing – There is a mirror image printing on the gum side of the label (Fig. 39, right). I could not reach definite conclusion as to how this happens. One suggestion is that a label remains at the printing area, and then a second label is printed on top of it. The new label is pressed against the wet ink of the first one, and its gum side receives a mirror image of the printing. This should be distinguished from cases where the paper is inserted with the gum side up, where the printing on the gum is a positive image. Another possible explanation – the paper coil does not supply a label under the printing head, and the cliché hits the printing bed. Then when the next label is being printed, its back side is pressed against that image and gets a mirror image. It has been reported that in some cases when a backprinted label occurred, the label before it had not come out. It is possible, of course, that both explanations are valid.

Fig. 39: Printing errors – multiple printing (left) and offset printing (right).

Unallowed values – The Klussendorf machine printing head comes from the manufacturer with four wheels, each having the 10 digits and the asterisk (*) clichés. Every postal administration programs the microcomputer to print values according to its own needs. In Israel the four digits are divided into two Sheqel positions and two Agorot positions, the decimal point (a triangle) being part of the paper. Since we do not use a single Agora anymore, the machines are programmed to issue labels in multiples of 5 Agorot, up to 15.00 Sheqels. Also, the leftmost digit (tens of Sheqels) can be only 1 (for 10.00 to 15.00), or * in 9.95 and under. The two middle positions use 0 when necessary. The rightmost position, as said, can be only 0 or 5. The exception is the Philatelic Service machine, which uses * instead of 0 for the three left positions, and which also allows for labels of higher value than 15.00.

But sometimes the wheels turn not as they are supposed to; Figure 40 (left) shows the process as it happens – we can see the lower part of the 0 and upper part of the 1. A few labels later the machine would have produced *1.05 instead of *0.05 (for the requested 5 Agorot!). The label of Figure 40 (centre) shows the “impossible” value of 1.16 – in this case all three wheels on the right turned one position ahead, starting from *0.05. On the label of Figure 40 (right), the leftmost wheel turned one position forward, from * to 0. The last two are from the same machine – the ultimate “impossible” would have been a combination of them, that is 01.16.

Fig. 40: “Unallowed” digits and values.

The Ottoman Period

Outstanding Levant Courier Cover from Safed via Beirut to Bucharest

(I. Karpovsky)

The inhabitants of Safed, a northern city in Israel (previously, Palestine) have on occasion taken advantage of their proximity to Beirut for postal services. The Turkish Levant postal service was unreliable, as compared to the Austrian. Couriers would deliver items to and from Beirut's Austrian office. Especially noted was the service provided in the 1880's by Moses Yedid Halevi, who on occasion marked by his private handstamps the items he carried^{1,2}.

Fig. 41: The reverse of a courier letter from Safed to Bucharest via Beirut, franked by stamps of the fantastic sum of 74¼ piastres (s. also the Back Cover illustration).

Shown on the Back Cover of the Bulletin is a cover sent in such a fashion at a later period (1906). It is unusual for its high franking rate. Its reverse, shown as Figure 41, carries most of the stamps. The letter was registered and sent by courier from Safed to "Beirouth" by Dawid Segall, addressed to "Banque Nationale de Roumanie a Bucarest (Roumanie)". It contained a large sum of money in notes according to the sum written on the cover ("11600 francs") and the franking covered both registration and insurance. This sum was the equivalent of U.S. \$60,000.00 in 1992 currency. Seven stamps together reached the high value of 74¼ piastres, which may be the highest valued franking of any known Austrian Levant cover.

The stamps are affixed to both sides of the cover. There are seven Austrian cancellations dated "19.VI.06". On the reverse there are five red wax seals with the sender's name.

The letter passed through Constanta and carries a Bucharest arrival cancellation dated "4 JUL 906".

Two Interesting Notices from the Ottoman Period

We show two interesting public notices, submitted by our member Joseph Hoffman. The first (Fig. 42), issued by the Turkish Post in May 1914, was probably the result of the fierce competition among the various post offices which operated then in Palestine. It translates*:

"In order to facilitate the development of commerce and business in the country, daily service has again been opened between Jaffa and the following:

Haifa, Zichron Yaacov, Acre, Safed, Tiberias, Nazareth, Damascus, Beirut, Aleppo, Smyrna and Constantinople.

The Management"

The second document (Fig. 43) is a sailing schedule from the Jaffa Russian Post Office for April & May, 1914. The schedule of 9 maritime routes lists date of arrival in Jaffa, ports of origin and destination, and the name and company of each ship.

Important for postal historians is the footnote of the announcement, which reads:

"1. Mail to the Syrian ports leaves on Sundays and Thursdays at 5 p.m. and on Mondays and Wednesdays at 11.30 a.m. 2. To Western Europe, Russia, North and South America, Constantinople, Africa, East and West Indies, Australia and Japan - on Mondays and Wednesdays at 4.30 p.m. 3. To Beirut and Constantinople - on Wednesdays at 4 p.m. 4. The mail to Jerusalem leaves every day at 4 p.m., and on Mondays and Thursdays also in the morning".

* Inexplicably, there are several not trivial differences between the French and Hebrew texts; the above translation takes both into consideration.

The British Mandate Period

Answering a Question? *(Arthur M. Hochheiser)*

In the Winter/Spring 1992 Issue of our bulletin (HLPB #49/50 p. 481) there is a short article entitled "A difficult Hebrew Code" by Y. Levanon of Jerusalem. He pointed out peculiar spellings in the Hebrew text of the telegram form shown on page 482.

As a collector of this material, I am always pleased to see 'errors' pointed out in texts, especially in Hebrew since most Americans, like me, are not conversant with the Hebrew language. Mr. Levanon is to be commended.

The last line of his article reads: "Postal Form No. 6813 H & S was not properly proof read. Does any of our readers know the code to this form?"

There are very few philatelists who have collected Palestine Postal Forms. Included among these forms are the telegram forms since the telegraph system was under the direction of the Postal Administration. I can make several observations since I have studied this material for many years.

"6813 H & S" found at the bottom of the telegram form is not a form code and note that there is no 'No.' preceding it. While some telegram forms issued early in the Civil Administration in Palestine for special purposes contained coded P.T. numbers, most of the Postal Agency telegram forms for general use by the public did not. In all cases, these P.T. code numbers appeared at the top or in the middle of the form and not at the bottom. The "6813 H & S" found on this telegram form is a shortened use of a "Printer's Legend". Such legends are common on forms and postal stationery. A typical full printer's legend would read 893 13 1 25 10000 GP". This consists of four items; one or two of which may be missing as is found on the telegram form illustrated.

The four parts are (1) Company Work Order Number (2) Date of Issue (3) Quantity Printed (4) Printer's Name or Initials. Here the "6813" is the company's work order number and "H & S" are the company's initials. While I have an identical copy of this form, I have never found a different form of any type with this printer's legend. The date on this form indicates very early usage. It may well be that because of the errors in their text, this company was not used again by the Postal Administration for further printing of postal forms. It should be pointed out, in this respect, that almost all forms for the Palestine Administration were printed in Palestine.

“Jerusalem I 4 Mils from Position 20 with Type 22 Overprint”?

(Comment by *D. Dorfman* and Response by *N. Collins*)

A note by this title was published by Norman Collins in HLP# #47 (p. 330) and also in BAPIP and TIP journals. David Dorfman responded with a comment in BAPIP #131 (p. 20), reprinted hereafter, to which Collins responds in the following.

(a) Dorfman's Comment

The purpose of these few comments is to dispel any notion that Mr. Collins has discovered a new rarity.

In the course of my research into this issue of Palestine (as well as all others), I have positively concluded that no partial sheets were overprinted with the First Setting of the overprint. Whatever vertical or horizontal shifts exist, they never exceed a quarter of an inch in either direction.

Recently, I had to retrieve my sheet of the 4 milliemmes from my bank, and during the course of checking other things, I decided to scan the 10th vertical column for a plate flaw similar to the one for position 20. Lo and behold, position 22 in my sheet has the same plate flaw! I decided to check other reference material to see if this flaw could be found in later issues, such as Second Setting, or Third Local overprint, but this flaw wasn't to be found there. Looking for differences only between positions 20 and 22, I noted that the right leg of the R in FOUR in the left panel of position 22 is truncated, whereas on position 20 it isn't.

Aware that Mr. Nathan Zankel had access to several sheets, I wrote him about my findings, and asked him to check his material also. In due time Mr. Zankel replied. He sent photocopies of two upper panes of this stamp, both showing the plate flaw on position 22 similar to position 20. Also, a photocopy of a large positional block which did not show this flaw in position 22.

What does all this prove? Merely that Mr. Collins found a used example of the 4 milliemmes, First Setting, position 22, with a transient plate variety that has now been found in several sheets.

Incidentally, page 25 of my book mentions that the Cone variety (position 82) is not found on all sheets of the 4 milliemmes. It so happens that only one of the panes that Mr. Zankel has shows this variety – the other does not.

(b) Collins' response

Having seen Dorfman's comments (BAPIP Bulletin #131, p. 20) regarding my report on the 4 mils variety, which was expertised in 1979 by the late Dr. H.H. Hirst, I can now agree that the stamp is in fact from position 22 and not position 20. This is following the stamp's examination by Nathan Zankel and the Mandate Study Circle of New Jersey, USA.

It is obvious that in 1979, when this stamp was first examined, the transient mark on position 22 was not known to the late Dr. Hirst. Dorfman himself did not know of it at that time either, because after I reported it to him in December 1979, he confirmed by letter in January 1980 that it was the first example of a Jerusalem I First Setting stamp with a misplaced overprint. Previously he had only recorded misplaced overprints on Second Setting stamps.

Unfortunately, Dorfman's letter had slipped from my memory when preparing the article, more than ten years later. My fields of research are mainly on archives and postal history and I do not have specialised files on stamps overprints and varieties. I only re-discovered Dorfman's letter after my article had been sent for publication.

Nathan Zankel wrote to me in November 1991 informing me of the transient mark on his blocks of 4 mils First Setting and supplied photocopies of these. I sent the item for further examination by Nathan and the SIP Mandate Study Group, who specialise in this issue. The study group examined my stamp and their material with a 10 X optical comparator, measuring the stamps from the bottom frame line, and found that the constant mark on position 20 is 9.3 mm from the frame line and the transient mark on position 22 is 9 mm from the frame line.

It is to the credit of Nathan Zankel that on discovering the transient mark on position 22, he contacted me, as the original writer, and did not himself rush into print. Fig. 44 shows a strip of the 4 mils First Setting of positions 20, 21 and 22. Note the mark in the right hand frame on position 20 and 22; it is constant on position 20 but transient on position 22.

Acknowledgements: My thanks to Nathan Zankel and the SIP Mandate Study Group of New Jersey, for their kind co-operation and courtesy.

Fig. 44: 4 mils 1st Setting – position 20 (with the constant flaw), 21 (without the flaw) and 22 (with a transient flaw).

Another Private Perfin on Mandate Stamps

(A.M. Hochheiser)

The Winter/Spring issue of the Bulletin (HLPB #45/46, p. 211), included my article on "Palestine Perfins and Non-Perfins".

It has been brought to my attention by Walter Loebl, editor of the BAPIP Bulletin, that "A third private company perfin was reported by the late Mr. Norgate in BAPIP #114, p. 144. It shows "VO" over "Co" and was presumed to stand for "Vacuum Oil Company" (Fig. 45). One example each was seen on the London I 5 mil and 1 piastre stamps, both used. On the 5 mil stamp the date was 12 April, 1924 and possibly Haifa".

This should complete the record on perfins and I thank Dr. Loebl for his kind permission to illustrate the perfin.

Fig. 45: "VO/Co" (Vacuum Oil Company?) perfins on Mandate stamps.

The State of Israel

Three Experimental "Paid" Cancellations from 1951

(B. Fixler & J. Nachtigal)

We have recently observed three unaddressed covers handstamped with a "Paid" cancellation, from the three major cities of Israel, Tel Aviv-Yafo, Jerusalem and Haifa. All are dated 15.4.51 (Fig. 46).

On April 23, 1951 new handstamps of Type C1 from these cities were first used, instead of the previous ones of Type A* (cf. Figure 47 for these Types but from

Fig. 46: Trial strikes of 3 "unissued" "Paid" handstamps.

* Cf. "Regular Postmarks of Israeli Post 1948-1990, Part 1" by Nachtigal & Fixler, Tel Aviv (1990).

other places). The major difference between the C1 and A Types cancellations are the positions of the Arabic and English names of the cities, their having been switched between right and left, the Hebrew remaining on top.

A similar switch occurred in the "Paid" cancellations, labelled E1 and E2, as seen in Figure 47, though the format was changed considerably, as well. E2 was first used in August, 1951.

The April 15 "Paid" cancellations contain characteristics of each of the types C1 and E: they have the structure of C1 and the contents of the E types**. The date of the three is eight days prior to the first use of C1. (The "Haifa 60" postmark was first used on August 19, 1951). It therefore seems likely that the three "Paid" cancellations were trials that were never used.

Fig. 47: Various types of "issued" handstamps.

Fig. 48: The 3 actually used handstamps similar, respectively, to the 3 trial "Paid" cancellations.

** But in this case the French and Hebrew "Paid" are not a fixed part of the canceller structure, but rather a changeable slug like the date pieces.

For comparison, three postally used cancellations from these cities and with the same indices, respectively are shown in Figure 48. The only difference between these and those of April 15 is the substitution of the Hebrew date in place of the "Paid" line (in French and in Hebrew: "PAYÉ יְשׁוּלָם").

Forerunner Services to the Mobile Post in Judea and Samaria

(B. Fixler and J. Nachtigal)

Mobile Post services were first instituted in Judea and Samaria on July 14, 1970, using line number 37, called "Biqat Hayarden" (Jordan Valley) which served the Jewish settlements in that area*.

Post offices were established for the Arab population of the area within a month after the conclusion of the Six-Day War (June 5 to 10, 1967): 7 in July, 12 in August, and more thereafter.

Josef Wallach of Rehovot has supplied us with schedules of two Mobile-Post-like services for the Arab communities in the area, one in the south and one in the north, instituted in August, 1967, prior to the establishment of regular Mobile Post services. Arrival and departure times as well as distances in kilometers are noted for each route, as for regular Mobile Post schedules.

The earliest table (Fig. 49)** is from August 17, 1967, the "Southern" line serving 5 communities, two of which, Bet Gala and Bet Sahur, having a regular Post Office opened only on August 23. The "Northern" line served 9 communities, 4 of which were to have a Post Office later. They were Al Bira (on 27.8.67), Anavta and Deir el Gusun (on 29.8.67) and Silat ed-Dahr (on 31.8.67).

Schedule number 2, dated 1.9.70 (Figs. 50-51), includes three Jewish communities: Alon Shevut, which opened a postal agency on 14.7.73, while the two others (Rosh Zurim and Kefar Ezyon) are still served by the Mobile Post, line number 45, named "Zefon Yehuda". (Its previous name was "Hare Yerushalayim" and began service on 24.11.81, changing its name to that noted above on 23.12.86).

* Its name was changed on September 12, 1976 to "Habiqa", and it was suspended altogether after March 31, 1992.

** The English translation in the Tables were added by the authors.

Figure 51

Undercover Mail *(Lawrence Fisher, Raanana)*

When the Israel Defence Force recaptured the West Bank and Gaza in the Six Day War of 1967, the Arabs living in those areas suddenly found themselves cut off from their brethren in other Middle Eastern countries, non of whom had any communication or postal links with Israel.

The Palestinian Arabs had to find a way of sending mail from the administered territories in Israel to friends and relatives residing in other countries in the Middle East. As a result, they set up links through the Post Masters of various countries who had links with both Israel and Arab countries. Mail intended for an Arab country was addressed and placed inside another envelope which was addressed to the Post Master who would then forward the inner envelope to its intended destination. The same method of communication existed for contact with Israel. Payment to the Post Master for this service was by International Reply Coupon (IRC).

The most common undercover address was the Post Master of King Edward Street Post Office in London (Fig. 52). The most obvious example of the intention can be seen by the cover intended for "London, Cairo" (Fig. 53).

A scarcer transit address is the Post Master of Nicosia, Cyprus. Shown in Fig. 54 and Fig. 55 are covers to this Post Master from Israel and from the Post Master to Israel.

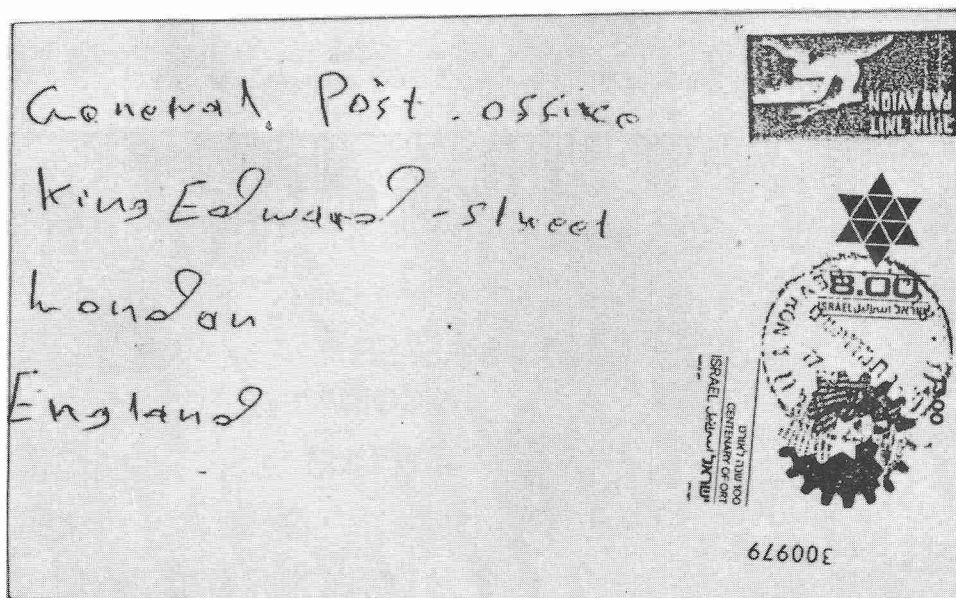

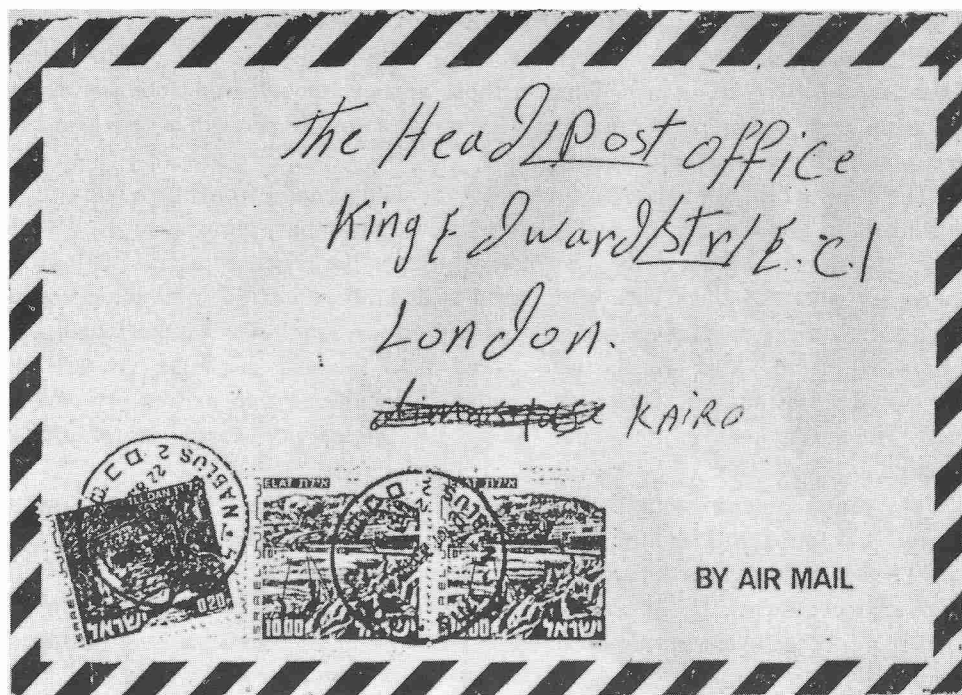

Fig. 52: Letter sent via King Edward Street Post Office in London, as an undercover.

*Fig. 53: Another letter sent to the King Edward Street Post Office in London.
Note the addition of "Kairo" to the address.*

Fig. 54: Letter sent via the Post Master of Nicosia, Cyprus from Israel.

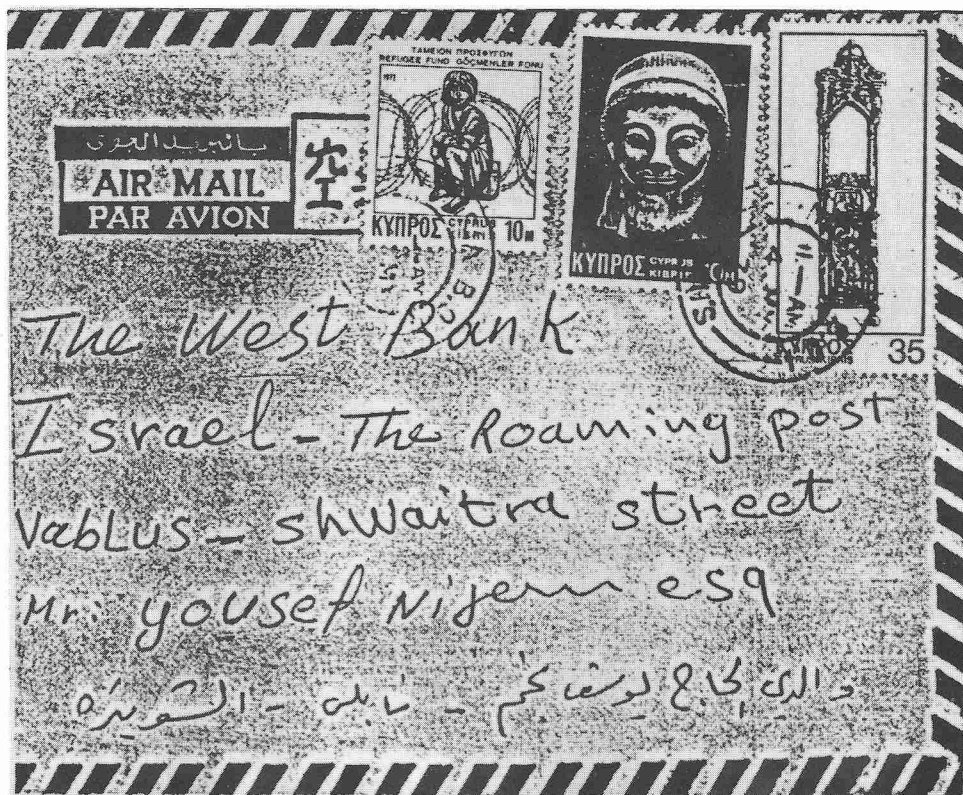

Fig. 55: Letter sent from Cyprus to the West Bank, Israel.

This service existed with the approval, albeit reluctant, of the Israel Military Governor since some of the mail was censored and allowed to continue on its journey (Fig. 56).

This system of communication is very similar to that of the Thomas Cook address in Lisbon which existed during World War Two. Due to the existing political considerations all the sides deny the existence of this service, as they did for the Thomas Cook service.

Fig. 56: Letter sent to the King Edward Street Post Office in London, which was censored by the Israeli Censor.

Changes and Variations in R-Labels used in Israel (Part II)

(M. Sender, Herzliya)

Further to my first article published in HLPN No. 44, I would like to bring a second list of changes in new R-Labels issued lately in Israel. In this note I refer only to changes in the Latin spelling of place names.

The old labels are shown in column A; the new ones in B.

1. Tirat Karmel: "Ha" (the) was added between the two words of the name and the letter K was replaced by C.
2. Doar Na Yizreel: In the name Yizreel, the letter Y was deleted and one of the E's was replaced by A'.
3. Doar Na Hof'Azza: One of the letters 'Z' was removed.
4. Doar Na Hanegev: The words 'Doar Na' were deleted.
5. Doar Na Menashshe: One of the 'sh's was omitted.
6. Alfe Menashshe: As above. In addition, the letter 'I' was added to the word 'Alfe'.

7. Nahalat Yehuda: The letters 'a' and 'd' in Yehuda were switched (a printing error - ed.).
8. Bet El "A": The letter 'I' was added in the word Beit, and the index 'A' was removed.
9. Metar: The letter 'I' was added.
10. Merkaz Shappira: The letter 'K' was exchanged for 'C' in the word Merkaz. In the second word, one of the letters 'P' was deleted.
11. Qiryat Zanz: In the first word the letter 'Q' was exchanged for 'K', and in the second word the letter 'Z' was exchanged for 'S'.
12. Maale Efrayim: The letter 'Y' was deleted in Efrayim, and a hyphen added between the two 'A's of 'MAALE'.

 26.04.92: "Memorial Day", Lod*.
 29.04.92: "50 years since the captivity of the Yishuv Volunteers during World War II", Tel Aviv–Yafo.
 30.04.92: "50 years since the Janusz Korczak murder / Heroes & Martyrs Day", Lohame HaGetaot.
 03.05.92: "50th anniversary of the Association for the Welfare of Soldiers in Israel", Tel Aviv–Yafo.
 03.05.92: "KKL/JNF 90th anniversary exhibition and Ashdod 35th anniversary", Ashdod.
 04.05.92: "Greeting to GRANADA '92. 61st FIP Congress", Tel Aviv–Yafo.
 05.05.92: "Israel Postal Authority – 5 years", Yerushalayim.
 06.05.92: "With compliments from I.D.F. / I.D.F. Presentation from the Chief of Staff", Tel Aviv–Yafo.
 07.05.92: "Israel Air Show", Ben Gurion airport.
 10.05.92: "Pionki 50 years. Meeting of Pionki survivors". Tel Aviv–Yafo.
 10.05.92: "Dedication of the CBI center for environmental studies / Yehoshua Gardens Tel Aviv", Tel Aviv–Yafo.
 11.05.92: "EXPO 92 Sevilla Universal exhibition, Israel Day", Yerushalayim.
 18.05.92: "KKL/JNF 90th anniversary World Gathering", Yerushalayim.
 22.05.92: "Israel's philatelists greet World Columbian Stamp EXPO '92", Tel Aviv–Yafo.
 28.05.92: "Rotary 32nd district conference. District 2490, Israel", Caesarea.
 31.05.92: "25th anniversary of reunification of Jerusalem", Yerushalayim.
 02.06.92: "Opening of the Feher Jewish Music Center", Tel Aviv–Yafo.

 * These were used as special postmarks for the F.D. of the corresponding stamp issue.

02.06.92: "Computerized post office", Bene Beraq.

16.06.92: "Rabbi Hayyim Benatar", Yerushalayim*.

16.06.92: "Rabbi Shalom Sharabi", Yerushalayim*.

16.06.92: "100 years Jaffa-Jerusalem railway line", Tel Aviv-Yafo*.

Fig. 57 (continued): Special cancellations used in Israel in the last period.

B. Definitive Cancellations

- 12.04.92: "Bat-Yam 510 ד", New Francotype machine in the postal branch, 62 Balfour st., Bat Yam. This time the inscription "Israel Postal Authority" was included in the cancellation.
- 16.04.92: "Beer Sheva 49", additional postmark in Beer Sheva post office.
- 16.04.92: "Ashdod 26", additional postmark in Ashdod post office.
- 20.04.92: "Betar Illit", Zahal, for the postal agency, Grade B, in Betar Illit.
- 29.04.92: "Arara 1", for the united Arab village Arara, formed of the former Arara and Ara (L.D. of 'ARA' postmark - 28.4.92).
- 03.05.92: "Haifa 117" "Haifa 118", additional postmarks in the BPO, 22A Hanevyim st., replacing "Haifa 40" and "Haifa 47" which were lost.
- 17.05.92: "Azza 8", replacing the previous postmark "Beit Hamemshal Gaza", which was last used on 15.5.
- 20.05.92: "Makkabbim - Reut", for the postal agency, Grade A, in Makkabbim-Reut.
- 31.05.92: Last day of Kefar Giladi postal agency. The kibbutz now gets postal services from "Hagalil Ha-Ellion 2" Mobile Post.
- 24.05.92: "Tel Aviv-Yafo 185", in Shechunat HaTiquwa (Tel Aviv) BPO, instead of a similar handstamp which was worn out.
- 02.06.92: "Holon 10", for the postal agency, Grade A, in 169 HaHistadrut st. (This postmark was used before in Holon main P.O.).
- 31.06.92: Last Day of "Nahariyya 619 ד" Francotype machine.

Correction: Last Day of "Nahal Lakhish-Zafon" Mobile Post was 10.01.92, and not 11.01 (as reported in HLP# 49/50).

New Stamps and Postal Stationery

(1) **Stamps and Stamp Booklets.** The following stamps were issued during the last period:

16.6.92: 100th Anniversary of the Jaffa–Jerusalem railway line (85 Ag, NIS 1, 1.30, 1.60); also booklet of one pane, composed of these four stamps without tabs (tete-beche se-tenant) – see Figure 58. Rabbi Hayyim Benatar, 1696–1743 (NIS 1.30); Rabbi Shalom Sharabi, 1720–1777 (NIS 3.–).

(2) **Prestamped Envelope.** On 2 June, 1992, a long forgotten postal item was issued by the Postal Authority – a prestamped envelope, imprinted with the non-denominated Anemone stamp in red and green for “standard local letter” (Fig. 59). The envelopes are sold in packs of 10 for NIS 8.50 (that is a premium of 10 Ag for each envelope) with an introductory leaflet (in blue) in every packet (s. Fig. 60) advocating the proper way of preparing a letter’s envelope (postal code, place of stamp and address, etc.)

Only a few prestamped envelopes were issued in Israel, a long time ago: in September 1950 – the Independence Envelope (Flag ‘stamp’) and the Weizmann Envelope (Negev ‘stamp’); in August 1965 – 4 illustrated airmail envelopes on the theme of land development.

Fig. 58: The booklet commemorating the 100th anniversary of the Jaffa–Jerusalem railway: (top) the booklet cover; (bottom) the left inside cover and the pane of stamps.

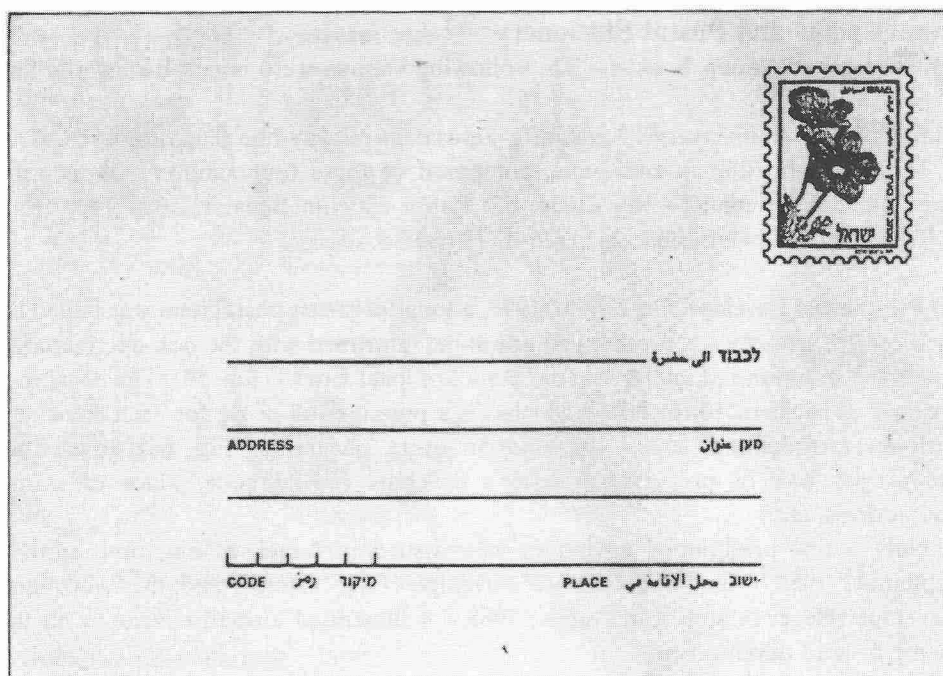

Fig. 59: The pre-stamped cover for inland use, issued on 2 June, 1992.

Fig. 60: The informative leaflet leading each packet of ten pre-stamped covers.

Additional Issues of Computerized Meter Postage Labels

The Postal Authority is widening the computerization of its post offices around the country, part of which program is the introduction of many more "computerized counters" which among other services produce Computerized Meter Postage Labels, first introduced experimentally on 17.6.91 in Beit Hakerem¹ (Jerusalem) and on 17.12.91 in the Soncino post office² (Tel Aviv).

At this stage 57 such counters are introduced in eight post offices in Tel Aviv and one in Benei Beraq according to the following list (in parentheses – the number of active counters in the P.O.):

Tel Aviv: 1. Yad Eliyahu, 23 La Guardia St. (4); 2. 67 HaUniversita St. (5); 3. North Telephone Exchange Building, 108 Even Gvirol St. (10); 4. The Central Sorting Office, 137 HaHagana Rd. (5); 5. 121 HaHashmonayim St. (10); 6. Hadar Dafna, 41 HaMelech Shaul St. (7); 7. the Industry Building, 29 HaMered St. (4); 8. 36 Geula St. (6).

Benei Beraq*: 75 Rabbi Akiva St. (6).

Each counter has its own identity number, which is printed on its labels. These counters are planned to be first operated (at least for the purpose of producing labels for the public) from 27 July, 1992** and during August, and possibly somewhat later.

References: (1) Z. Shimony, "Experimental Computer-Operated Meter Postage Machine", HLP# 47 (1991) p. 345.

(2) N. Shereshevsky, "New Computerized Meter Postage Labels", HLP# 49/50 (1992) p. 496.

* It is reported by some philatelists that at least one computerized counter in Benei Beraq already operated on 2 June, on the occasion of the celebration of this event and the issue of a special cancellation to commemorate it.

** On this date the 7 counters at Hadar Dafna B.P.O. (No. 6 in the above list) were first operated.

Holy Land Awards in "Granada '92"

An unusual number of Holy Land exhibits were shown at "Granada '92", the only FIP World Stamp Exhibition this year, which took place in Granada, Spain, between 24.4-3.5.92. Their awards are listed herewith.

Large Gold

Z. Alexander - "Turkish Post in the Holy Land".

F.F. Blau - "The airmail history of the Holy Land" (FIP Champions Class).

Gold

Z. Galibov - "Palestine British Mandate".

I. Karpovsky - "Israel Transition Period: cities under emergency conditions".

Y. Shabtai - "Israel: the Doar Ivri issue".

Large Vermeil

Y. Rimón - "1948 local and provisional postal services".

Vermeil

K. Bar-Ilan - "The Doar Ivri issue".

F.F. Blau - "K.u.K. Austro-Hungarian fieldpost, WWI".

J. Slutzki - "Palestine rates and routes, 1927-1948".

Y. Tsachor - "Doar Ivri rates and routes".

C. Shiftan - "Correspondence and relations between Germany and the Holy Land".

Large Silver

A. Croten - "The internal-foreign surface rates of Palestine Mandate".

Silver Bronze

G. Moscati - "From the promised land to the State of Israel".

Bronze

S. Hassan Benasayag - "The Holy Land".

W. Lowenberg - "Israel".

Book Review

The Foreign Post Offices in Palestine 1840–1918 (Volume II), by Anthon Steichele; English revised translation by N. Collins and L. Dickstein (price \$50 + postage, SIP Educational Fund, 25113 Daffield Rd., Cleveland; OH 44122, USA).

This is the second of two volumes covering, in great detail, the Foreign Post Offices in Palestine during the Turkish occupancy. It complements the first volume and so includes, as one of the Appendices, a valuation guide for all of the many postmarks listed in the volume. This is of tremendous assistance to the philatelist and now gives, together with Vol. I, a comprehensive guide to all of the known postmarks of that period.

Volume II includes the Italian, Austrian and Russian Post Offices, and also those of the Jewish Colonies. Further material included covers the Italian and French Forces in Palestine during World War I, a brief cover of the ever more interesting Hotel Cachets, and corrections and additions to Volume I.

The coverage is immense. Not only are the various known postmarks listed, but also included is a history of the particular Post Office, the postal rates applicable, registered marks and labels, postage due, maritime markings where applicable, and a listing of the currently known forgeries.

As in Volume I there are a tremendous number of illustrations, many of which are unique. These cover almost all of the postmarks, and include all of the known rarities. One pity is that in many cases these are not as sharp as would be expected, but this is no doubt due to the many times the photocopies were recopied.

One mistake only is included. Steichele claimed that the Austrian Post Office finally moved into a building in Jaffa Street. This is surprising of him, since of all the Foreign Post Offices the Austrian was the only one to remain within the walls of the Old City in a building (since demolished) opposite the entrance to David's Citadel, until its closure in 1914.

The book, although rather expensive at \$50 is of such value that no philatelist interested in the field of Postal History of Palestine can be without it in his reference library. It is doubtful if it will ever be replaced by another work, as this has replaced the pioneer work of Pollack.

The set is an example of a remarkable cooperation, based on the outstandingly important basic work of the late Anton Steichele in German, between its translator, the late Leonard (Paul) Dickstein and the overall editor and well known researcher, Norman Collins. They deserve our heartfelt thanks for having made this very important work available to the larger audience of English-speaking philatelists throughout the world. Also to be congratulated are the associate editors Jerome L. Byers and Emil S. Dickstein, the producer Fred F. Blau and last, but not least, Arie Ben David who baked up the whole project as the President of the W.P.C. who published the two volumes of this momentous work.

(E. Glassman)

עוצמה, מעוף והתחדשות מתמדת. הפניקס הישראלי.

האגדה מספרת כי הפניקס הנה ציפור
קסומה, המעוטרת כשמש בנווני שני
וזהב ומגליה עוף בשמי מדבריות ערב

כ-500 שנה מתמידה הפניקס במעופה
בערוב ימיה היא שורפת עצמה באופן
מופלא, זמנוך הלהבות קמה לתחיה
פניקס חדשה, סמל אנדי להתחדשות
מתמדת ולעוצמה.

הפניקס הישראלי, חברת ביטוח איתנה,
דינמית, כעלת מעוף והתחדשות מתמדת
כאותה צפור מופלאה.

הפניקס הישראלי-אין זו אגדה.

הפניקס הישראלי
חברת ביטוח טובה

III 51 תולדות הדואר של ארץ ישראל

בטאון רשמי של האגודה לתולדות
הדאר של ארץ-ישראל

מכתב שליח רשום ומבוטח מצפת דרך בירות לבוקרשט משנת 1906. המכתב, שהכיל סכום כסף גדול, בויל בבירות בבולי הדואר האוסטרי בלבנט בתעריף העצום בסך 74¼ פיאסטר (רוב הבולים באחורי המעטפה)

A 1906 registered insured courier letter from Safed via Beirut to Bucharest. The letter, which contained a large sum of money, was franked in Beirut with Austrian Levant stamps of fantastic total value of 74¼ piastres, most of the stamps being tied to the reverse (see note on p. 562)
